PEACE 

PEACE offers comprehensive family planning services and urgent pregnancy care

FAMILY PLANNING AND URGENT PREGNANCY CARE

At PEACE we provide the full spectrum of reproductive health care for planning and preventing pregnancy, treatment of early pregnancy complications and pregnancy loss, and provide options and care for unplanned pregnancies or medically complicated pregnancies.

OUR MODEL OF CARE

The PEACE team provides evidence-based, patient-centered care to address your medical and emotional needs and our providers work with you to develop a personalized treatment plan.

Our specialized obstetrician/gynecologists and clinical staff are experts in family planning and providing medical care to meet the reproductive needs and concerns of individuals with complex medical conditions. We partner with your primary care doctor and specialist to ensure that your care is coordinated.

Services Available Include:

- Emergency contraception, including intrauterine device (IUD)
- Contraception consultation and management
 - Hormonal contraception
 - Long Acting Reversible Contraception (LARC) including hormonal and non-hormonal IUDs and contraceptive implants
 - Sterilization
 - Pregnancy options counseling
- Evaluation of pain and bleeding in early pregnancy (less than 16 weeks)
- Medical and surgical management of miscarriage
- Medical and surgical termination of pregnancy
- Pregnancy loss/abortion counseling and referral

At PEACE, our priority is to provide you with expert care and attention so that you are empowered to make the decisions that will shape your life. Our team provides compassionate care at the time when you need it most. Whether you are experiencing the loss of a pregnancy or need to make a decision about your health and the future of your pregnancy, we are there with you.

RESEARCH

The PEACE team believes that healthy reproduction is the foundation of a healthy society. PEACE is committed to advancing research in women's health that will benefit our patients. Our research program is working to develop new forms of contraception to make contraception more available and affordable; to improve miscarriage management; and to uncover the causes of early pregnancy loss. For more information about our research, please visit:
