# Referring provider experience

One Location. One Care Team.

Specialized Model of Care.

Partners in Care with you and your patient.

# Patient experience

*Being at the Center, they really took the time to talk to me, make sure my emotional needs were met. The team who did the procedure was absolutely wonderful...They were really good at meeting me where I was at – as a psychologist, it was actually how I would want someone to act. No one woman goes through it the same – everyone’s experience is different, and making sure that care is focused on what is right for that woman is the most important part.*

*Having someone there during the procedure put it in a different mindset, it allowed you to kind of release your feelings at that time...*

*They streamlined everything. I knew where to go and what to expect and I knew what they were going to tell me and I knew what their options were going to be. I called and they said okay come in the day after...I didn’t have to do sit in the ER, I didn’t have to wait for an appointment for weeks.*
